Forms: 7-8 **pompelmous,** 7 **pampelimouse,** 8 **pamplemouse, pumplemous,** 8-9 **pompelmoose,** 9 **pompol-mos, pompelmoosa, -mosse, -mous; pampō-, pamplemoosa, pampelmoosa;** also 7-9 **pampinesse,** 8 **pumble-, pummel-, pimple-nose.** [A name which arose in the Dutch Indies in 17th c., and is given by early writers as the Dutch name of the fruit. *Du. pompelmoes* is recorded from 1676: *F. pamplemousse* now *pamplemousse*) from 1698.

There is no native name in Malayan resembling *pompelmoes*; the Javanese name is *sjaddok*, the Chinese *yu*. In the opinion of Dr. Rees of London, who has given special attention to oriental words, this is a compound, of which the second element is prob. *limoen* (q.v.) Fr. anthography *limoesse*), a name applied in the 16th c. in Old Javanese, Malay, and Lampung, borrowed from the Pg. *limoeiro*, pl. of *limão*, lemon, citron, under which the Portuguese included the species of *Citrus* found by them in the East. In Malay, *limo or limaun* is still used in this general sense. The first element may prob. represent the Du. *pompoen* pumpkin, in reference to the large size of *Citrus decumana*, so that *pompelmoes, pamplemoes* may have been compressed forms of *pompoenlimoes*; s. 'pumpkin-like citrons'...as are the native designations. The name *pompelmoe* was actually applied to the fruit by Valentijn, *Oud-en nieuw Indiën*, Pt. III. 1726, Eng. translation, London 1807: see Pompoen 2. The common Tamil *bambhalmasu*, given by Lisboa and Harg.-Davis, as source of the Fr., with the more correct Tamil *pampalimasu*, and numerous variants cited by Watson, Yule, etc., are merely corruptions of the Du. or Fr. form. The fruit is not native to India, but was introduced from Java prob. in the 17th c., in Ceylon under its Dutch name by Knox. Its source is indicated by the designation *Batavia-aroodt* or -*wild*, Batavian Citron.]

The mod.Eng. *poor* and Sc. *puir* represent the ME. *povre*: with *uoȝ*, vulgar *pore*, cf. *wherre* and the pronunciation of *door, floor*.

On account of the ambiguity of the letters *u* and *v* in various of before 1600, it is sometimes uncertain ME. *pouere, povere, pouure, uouure pour-* or *pov-*. The phonetic values *pau(v)re, pouere, pauvre, pobre, povre*, shown that *pouere* preceded *povre*, which may have been resolved in late OF., and in the form in various mod.F. dialects. But the 15th and early 16th c. literary Fr. form was *pouvre*, additionally spelt in 15th c. *pouvre, povre*, after L. *pauper*, and ME. *povre* (the source of mod.Eng. *poor*) seems to have been imitated from *povre* (the *o* for *ou* as in *pour, tour*) from *louure*. Cf. also Poverish, Pourail, Pourparty. But some Eng. dialects now have *pour* (*pwar*), which prob. represents ME. *poer* (*pōr*).]

L. *spīnus* thorn (cf. L. *spīnax*, Sp. *espín*, OF. *espin* a thorn-tree). The gender of the compound is not very clear, unless it began as short for *porcus spinosus* = L. type **porcus spinosus* spiky or prickly pig. The *β*, γ, and δ forms appear to be English corruptions, due to imperfect apprehension of the foreign word, and to 'popular etymology' identifying the ending with *pen*, *point*, etc.; the type *porkepyne* may have arisen out of F. *porc(-)-d'épine*, with *e* mute. The *e* forms really represent a different compound, viz. F. *porc-épic*, in 16th c. *porc-espic*, OF. and Pr. *porc-espi* (13th c. in Littré), in which the second element is F. *épi*, OF. *espi* = L. *spīcus*, -*um*, collateral forms of *spīca* spike. Pore (pōə), *v.* Forms: 4 pure, pourl, 4–5 poure, 5–7 powre, 6 poor, 5–8 poar, 5– pore. [ME. *pūren*, *pourren*, *pourl*, of obscure origin. There is no corresp. verb in OF. or OE., though the early ME. forms answer to an OE. **pūrian*. Some *r* is strikingly identical with the main sense of PEER *v.*[1], PORE *v.*, both alas of obscure origin; but, although an OE. double form **pūrian*, **pūrra* would explain the forms, there is no trace of such a verb in OE. or the cognate languages. The phonology is abnormal: the ME. (pūr-) would normally have given mod. *poor* (pʊə), whereas in the 15th c. the form began to be *pore*, *poar* (pōə).]

1885 in Webster (Annandale).

† **Porphyro·genite.** *Obs.* rare. In L. form **porphyrogenitus,** fem. -a. Also 7 -genete. [ad. med.L. *porphyrogenitus*, ad. late Gr. πορφυρογέννητος, f. Gr. πορφυρ-, combb. form of πορφύρα purple + γεννητός born. So F. *porphyrogénète* (Balzac 1834).] Originally, one born of the imperial family at Constantinople, and (so it said) in a chamber called the *Porphyra* (πορφύρα). Hence, a child born after his father's accession to the throne; and in more general or vague sense, = One 'born in the purple': see Purple *sb.*

The actual origin of the name *Porphyra* is disputed.

1614 Selden *Titles Hon.* 61 There be found Twoe the Emperours...to have been publickly appointed for the Emperours Children;...They call that Senate, *Porphyra*, whence the name of the *Porphyrogeniti* came into the world. 1619 Purchas *Microcosmus* lxxxii. 1161 Not in a Palace prepared, as the *Porphyrogeniti* had (a Constantinople)...but in an Inne. 1680 Hickes *Lond* (1708) 149 Purple is the Imperial and Regal colour, as proper therefore unto Kings and Emperours, that many of the Constantinopolitan Emperours were called *Porphyrogeniti*, because at their first coming into the world they were swept in Purple. 1707–27 Chamberlayne *Cæsl. Porphyrogenetus, in antiquity*, so signifies him given to the children of the eastern emperors,...Concerning will have the word to signify, *born in the purple palace*, or *the palace of porphyry*, a palace so called in Constantinople; wherein the emperours used to be lyn. Others derive the appellation hence, that the imperial children, as soon as born, were wrapped in purple; others, that the chamber wherein they were born was strewed with purple hangings. 1788 Gibbon *Decl. & F.* (1796) IX. 66 n. It is Greek language *purple* and *porphyry* are the same word;...an epithet usual of the Byzantine palace was lined with porphyry; it was reserved for the use of the pregnant empresses; and the royal birth of their children was expressed by the appellation of *porphyrogenite*, or born in the purple. This peculiar mansion was long applied to Constantine the strands. 1831 Scott *Ct. Robt.* iii, Anna Comnena...an imperial Princess, *porphyrogenita*, or born in the sacred purple chamber. 1837 Sir F. Palgrave *Norm. & Eng.* II. 421 Hugh, the Porphyrogenitus, through a passage not collected by Ordericus, was the eldest son of royal blood, first born after the accession of Duke Henry to the Throne of Charlemagne. 1839 *Athenæum* 21 Feb. 164/1 The idea of his which is to be put out of bringing the porphyrogenitus of the English aristocracy face to face with all that is most modern in the American democracy.

Hence **Porphyroge·nitism,** the doctrine of succession in a royal family which prefers a son born after his father's accession to one born before that event; **Porphyroge·niture,** the condition of being born 'in the purple' (see above).

1837 Sir F. Palgrave *Norm. & Eng.* II. 422 The doctrine of Porphyrogenitism, congenial to popular sentiment and not without some foundation in principle, prevailed indifferently and widely in many countries and through many ages. 1839 *De Quincey Posth. [The ultimate source of the word in all its forms is Gr. πορφύρα adj. purple, πορφύρα sb. the purple-whelk, and its dye; but the stone was called in Gr. πορφύριτης, L. *porphyrites*, whence Portheretic. The Romanic names of the stone point however to late L. forms **porphyrius*, **porphyrus* (sc. *lapis*), purple (stone), or **porphyrium*, **porphyrum*: cf. Romanic πορφύριον. (*Porphyrius*, *Porphyrum* existed as a proper name: see Porphyrian[2].) For the stone, English shows three types: α. (= Chaucer, in sense 2) *porfyrie*, *-fyrie*, etc., a. 1. The word used to render L. *porphyrites*, Gr. πορφυρίτης, the name given to a beautiful and very hard rock anciently quarried in Egypt, composed of crystals of white or red plagioclase felspar embedded in a fine red ground-mass consisting of hornblende, plagioclase, apatite, thallite, and sphene, the last two being bright red in colour. By modern poets often used vaguely, in the sense of a beautiful and valuable purple stone taking a high polish, including red granite and marble.

The site of the ancient quarries, after being long lost, was discovered by Burton and Wilkinson at Gebel Dokhan, near the Red Sea, in lat. 27° 10' N.

In 16.: *porfido nero*, *porfido rosso*, were applied to black and green rocks of porphyritic structure obtained from Sardinia, Tuscany, and elsewhere, and these have been confirmed as *black and green porphyry*.

Geol.* vii. 119 The porphyry of the mineralogist consists of a reddish felspar basis with disseminated crystals.

b. In more general sense: Any unstratified or igneous rock having a homogeneous base in which crystals of one or more minerals are disseminated.

The name is sometimes applied even to rocks in which the porphyritic crystals are absent. Many fanciful or definitions of the term have been suggested by modern petrographers, continental and British, but without any general agreement as to the basis of definition: see, in English, Sir A. Geikie *Text-bk. Geol.* (ed. 1882) 229, Prof. Bonney in *Trans. Geol. Soc.* (1888) XLI. 91, Harker *Petrology for Students* (ed. 1902) 126, etc.

[Note. The retention of the sense 'haven' in 'harbourmaster,' to an inland town presents difficulties, though no explanation has been sought in the definition of L. *portus*, in the *Digest* I. xvi. 115 (ed. 1878) 239 'Portus appellatus est conclusus locus, quo importatur merces in locum egressumve eorum nihil solvitur: unde ad conclusa aliqua munita'. The transference of sense from 'gate' to 'walled town with gate' is also unlikely. Inasmuch as 'Port' and 'Ford', though representing respectively L. *portus* and *porta*, were both mass. in OE., the fact that the *port* was also pass. affords no evidence either way. The MFl. words are in a similar position: there *poert* 'haven' and *poerte* (later *poert*) 'gate' are both fem., and, *poert* 'town' being also fem., the gender gives no indication. But the oldest and prevalent form of the word was *port* as *poert*, *poerte* being recorded and late, and pass. due to confusion with *poerte* 'gate'. Verwijs and Verdam take it therefore as certain that *poert* 'town' represented L. *portus*; and if this was so in Flemish, it was doubtless so also in OE. The Netherlandish word was extensively used down to *c* 1500, and had numerous derivatives, of which *poertere* (burgess, *poert*, or *poertscap* (burgessship, citizenship, are still in use. Port (pōət), *sb.*[4] (*a.*) *Naut.* [Derivation obscure: see Note below.]

1. The left-hand side of a ship looking forward: = Larboard *sb.* Opposed to Starboard. (Often in phr. *to port*, *a-port*.)

It cannot have been generally substituted for the older *larboard* to obviate misunderstandings arising from the similarity in sound of *starboard* and *larboard*. By international convention, ships, esp. steamers, carry a red light on the port side.

1626–42 Middleton *Sea-mans Dict., To Port.* Is a word used in Cooling the Ship, they will use the word *cooling a Port*, or *Starby a Starboard*, the Ship heeles to Port; (what things were to part, or the like. **1633** T. Stevens *Pas. Wks.* ii. viii. (1861) 360 With two sables her might spend the Day either to Starboard or to Port. **1748** *Anson's Voy.* I. v. 104 The ship heeled ... two streaks to port. **1815** Southey *Poems* I. 31, 104 They...put the helm a-port, and stood after her again. **1844** *Admiralty Order* 20 May, The word 'Port' is frequently...substituted...for the word "Larboard", and so...the distinction between "Starboard" and "Port" is so much more marked than that between "Starboard" and "Larboard"...it is their Lordships'[s] desire that the word "Larboard" shall no longer be used. **1846** *U.S. Navy Department Notice* 16 Feb., It having been repeatedly represented to the Department that confusion arises from the use of the words "larboard" and "starboard" in consequence of their similarity of sound, the word "port" is hereafter to be substituted for "larboard". **1873** Brassey *Sailor's Pocket Bk.* 24, 206 If two sailing ships are meeting end-on,...so as to involve risk of collision, the helms of both shall be put to port, so that each may pass on the port side of the other. **1884** *Pall Mall G.* 25 Aug. 2/2 The...great bore of the Canadian coach, the port of the Prime becomes her rigging.

2. *attrib.* or as *adj.* Situated on, or turned towards the left side of a ship: = Larboard B.

1837 R. Times *Amer.* in *Papers* VII. 149 It was thought better to stand off on the port tack, in order to get well clear of the land. **1847** Brenton *Last. Sigh. [Note. This use of *port* may have arisen either from Port *sb.*[1], senses 2, 4, or from Port *sb.*[2], sense 1. When the steering apparatus was on the right side of the vessel the *starboard* or *starboard*, it would be convenient, in order to leave this free, to leave the *port* remaining point on the opposite side (the *dark board* or *larboard*). For the same reason, the vessel when in port, would naturally be placed so as to lie with her larboard alongside or facing the shore or port. For either reason, the larboard would be the port side. *Port* the larboard was in recorded not more than two centuries before it became official; the substitute of Port *sb.*[4] had a still earlier colloquial use.]

Porte [pɔ·t]. Also 6–8 port. [a. F. *porte*, in full *la Sublime Porte* = It. *la Porta Sublima*, transl. Turkish (Arabic) بَابِ عَالِي *bāb-i-ʿālī*, lit. 'the sublime, high, or lofty gate', the official title of the central office of the Ottoman government, comprising the office of the Grand Vezir, of the Minister of Foreign Affairs, and of the Council of State (Redhouse, *Turkish Lex.*, 1890). 'Gate' is supposed to refer to the ancient place of audience, etc., at the gate of the tent, or the king's gate; the attribute 'high' or 'lofty' is not literal, but the honorific attribute of the Turkish government. According to Zenker, the Western application of 'Sublime Porte' to the Turkish government or Ottoman state answers rather to the Turkish *dīvānī-i-ʿālīyye*, 'the sublime empire or state.'

In the 17th and 18th c., often erroneously taken as referring to the position of Constantinople as a sea-port.]

Porter (pō·ɹtəɹ), *sb.*[3] [Short for *porter's ale, porter's beer*, or *porter beer* (PORTER *sb.*[3]), apparently because orig. made for or chiefly drunk by porters and the lower class of labourers: cf. the early quots.

There is no direct contemporary evidence as to the origin of the name. Statements going back to c 1770 ascribe the first brewing of the liquor to Ralph Harwood (at the place afterwards called Dicker's Brewhouse, on the east side of High Street, Shoreditch); but these statements concern the origin not of the appellation *porter's ale, porter's beer*, but of the thing itself. The probability is that *porter's ale* or *beer* arose as a popular abbreviation of *porter's liquor*.

Angle of position: (a) The angle between any two points subtended at the eye; cf. *Station.* The angle between the circles of declination and latitude of a celestial body; (c) The angle between the hour-circle passing through a celestial body, and the hour passing it and a neighbouring celestial body; as in (a); the angle between the meridian of a place and the great circle passing through it and some other place. *Circle of position*: any one of the great circles of the celestial sphere passing through the north and south points of the horizon. *Line of position*: a heavy field gun, not designed for executing quick movements.

Prosody*, the situation of a short vowel before two consonants or their equivalent, i. e. before a consonant in the same syllable, making the syllable metrically long, as in *in-fer-tat-que, con-sec-ŭ = con-sec-tŭ-es.*

In such cases it used to be said that the vowel was 'long by position'; but the evidence of Greek and the history of the sounds in Romanic show that the vowel remained short, while the syllable was metrically long. Where both consonants could be taken to the following syllable, the preceding vowel might be 'by position' or not, as in *in-ar-dŭis* or *in-ard-dŭis.* In English and the modern languages generally, a long stressed vowel is often shortened by position, as in *wood, manfild* (*-field*), *stone, stone-cŏtter, bonefire, Auckland, Lyme, Lyndon.*

1. A system of philosophy elaborated by Auguste Comte from 1830 onwards, which recognises only positive facts and observable phenomena, with the objective relations of these and the laws that determine them, abandoning all inquiry into causes or ultimate origins, as belonging to the theological and metaphysical stages of thought, held to be now superseded; also a religious system founded upon this philosophy, in which the object of worship is Humanity considered as a single corporate being.

OF. *possession*, -*cion* (12th c. in Hatz.-Darm.), ad. L. *possessiōn-em* seizing, occupation, n. of action f. *possidēre*: see POSSESS, POSSESSOR.]

1. The action or fact of possessing, or condition of being possessed (see POSSESS 1, 2); the holding or having something (material or immaterial) as one's own, or in one's control; actual holding or occupancy, as distinct from ownership.

b. *Law.* The visible possibility of exercising over a thing such control as attaches to lawful ownership (but which may also exist apart from lawful ownership); the detention or enjoyment of a thing by a person himself or by another in his name; the relation of a person to a thing over which he may at his pleasure exercise such control as the character of the thing admits, to the exclusion of other persons; *esp.* the having of such exclusive control over land, in early instances sometimes used in the technical sense of SEISIN.

In the ROMAN LAW, 'possession is usually said to consist of two elements—physical control and intention to possess'; but in English law the latter element does not assume the same prominence, in the shape of *animus possidendi*, it has been thought to suppose in ROMAN law.... The general rule of English law is that excludes physical control gives legal possession, unless the apparent possessor holds only as servant or bailiff on behalf of another' (J. M. Lightwood in *Encycl. Laws Eng.* (1898) X. 198). Primarily, the term denotes a state of fact, but this fact carries with it legal advantages, and so is the source of rights. If the state of fact could always be ascertained with certainty, and if it always produced the same legal effects, the subjects of possession would present little difficulty; but it is frequently impossible to whom the actual control of a thing is to be ascribed, and, when this question is settled, the law may confer the advantages of possession to some person other than the apparent possessor.... Hence arises the distinction between *actual* and *legal* possession. Actual possession denotes the right of fact; but the person to whom are conferred the advantages of possession has the legal possession, whether he is the actual possessor or no. Legal possession, when not accompanied by actual possession, is known as "possession in law". (*Stroud*, 1082–3.) I. †**1.** From the beginning of the 16th c. applied to men with horses stationed or appointed to places at suitable distances along the post-roads (see Post-stage), the duty of each being to ride with, or forward with all speed to the next stage, the king's 'packet', and at length the letters of other persons, as well as to furnish change of horses to 'thorough-posts' or express messengers riding post. *To lay posts*, to establish a chain of such 'posts' along a route for the speedy forwarding of dispatches.

Posts were at first 'laid' temporarily only, when occasion demanded direct communication with a distant point; they were at length established permanently along certain routes. These 'posts' began in the 15th c. to be called 'post-masters' (q. v.), and were the predecessors of the present local postmasters, or persons in charge of the local post offices, who receive and dispatch the local mails. In the 16th and 17th c. these 'posts' had also usually the exclusive privilege of furnishing post horses to ordinary travellers, and of conducting the business of a posting establishment, which has since been separated from that of the Post Office.

[*Note.* The 'posts' in sense 1 correspond to the *cursus stationis* or "*ponendi hominem*" of classical and later writers (cf. Cæsar *B. C.* iii. 18). The earliest known use of *posta*, *poste*, pointing to the modern sense is by Matteo Polo, 1298, who applies, in the French text, ch. xciii. (ed. 1883, 220), *posta*, and, in the English, ch. lxxxi. and xlvi. I. 302 *poste*, to the stations or relay-houses of the great Khan, at which the messengers of the Great Khan or Emperor of China changed horses, and at each of which from 300 to 400 horses are said to have been kept for their service. The expression 'tenir *plusieurs postes de chevaux*', i. e. 'we say post for number of horses', shows that the word originally took its *posta* in the sense of Post 16? The early course of the word in Europe is not altogether clear; but Minsheim Latin documents of 1277-8 (L. Ord. Dan. *Holsatiæ*, 1870, II. 365, 391) have *postarium* the *mutation colonicæ* also *custos postarum*, 'let them be carried day and night swiftly by a post-rider (*veredarium*) of the posts', and *veredarii seu postarium*, 'let them be carried day and night swiftly by a post-rider (*veredarium*) of the posts', and *veredarii seu postarii* (*veredarius postarium*, 'let him send them by the horsemen of the posts'). In the second half of the 13th c. *V. posta* is found also in the application of the courier, and in this sense had become naturalized before 1281. In English, also, the application of *posta*, *post*, to the courier is seen to go back practically to the earliest use of the word.]

b. **Post captain.** A captain who 'takes post' : a designation formerly applied, officially and otherwise, to a naval officer holding a commission as captain, to distinguish him from an officer of inferior rank, to whom the courtesy title of captain was often given, either as being an acting captain, or as being master and commander of a vessel not rated to be commanded by a full-grade captain, and so not said to 'give post'. *Obs. exc. Hist.*

So far as the Naval Regulations are concerned the appellation appears to date from about 1912-49, and to have ceased in 1814, when the rule was laid down that only officers appointed to command 'ships of such rate and strength shall henceforth be styled Captains'. But, in unofficial language, the courtesy use of 'Captain' for the 'Master and Commander' of a smaller vessel, and the distinctive appellation 'Post-Captain', lingered on a much later period.

Postage stamp. [f. Postage[1] + Stamp 18.] An official stamp, either a stamp embossed on an envelope or impressed on a card or wrapper, or else (now usually) a small adhesive label having a specified face-value (in Great Britain from ½*d.* upward), and bearing a design of a certain pattern and colour appropriated to its value, sold by or on behalf of the Post Office, to be affixed to any letter or packet sent by post, as a means of prepayment of postage, and as evidence of such payment.

The design is generally the head of the Sovereign or Ruler (whence in Great Britain the early popular appellation 'Queen's head'), or the national arms or emblems, but many countries use various symbolic or fanciful pictorial devices, historical portraits, etc.

The name *stamp* was originally applied to the marks stamped or impressed by the Post Office on letters for various purposes, among others that of stating whether they were 'prepaid', 'unpaid', 'free', partly paid, or paid by the recipient or other post. When adhesive labels, and impressed envelopes were introduced in 1840, these took the place of the 'paid' or 'prepaid' stamp, and appear to have been popularly called 'postage stamps' from the first. The official and more accurate name was *postage label*; but the popular usage prevailed; by 1870 *postage label stamp* was in official use, and finally *postage stamp* was accepted. The actual stamps (Gen. Environment) which continued to be impressed by the Post Office after 1840, to show the place and date of postage and arrival, and to obliterate or refund the postage-label, are now usually distinguished as *postmarks* and *obliterating stamps* or *marks*.

Postage Label Stamps* (1852) 2 The employment (Archer's) appears to be a very clever and useful invention: we are thoroughly convinced that postage stamps separated by it, having jagged edges, will adhere to letters far better than those cut from the sheets by knives or scissors. 1840 *Ibid.* 2 Mr. Bokenham told me...he was very desirous about the sticking of the postage stamps to the letters, as there were upwards of 400 found daily loose in the bags. a 1862 G. Postmaster[2] (pō·stmɑ̆stəɹ). The name given at Merton College, Oxford, from the 16th c., to the class of poor scholars instituted in 1380 by John Wyllyot; now the equivalent in that college of the term 'scholar' in general collegiate use.

For the first hundred years these appear in the College Register only as *pueri* (*M. Nobiscum*, *Wyllyot*, 'Wyllyot's boys'. But their essential characteristic was the reception of a limited weekly portion; *stipendiarii portionis*; hence we find them also called *portionistæ* or *scholæ portionistæ*, a term Anglicized in the 17th c. as by Wood, to *portionists*. The age of the term *postmaster* is not certain. It occurs in the College Records in 1593 in the established sense of *Postmasters' Hall*, the dwelling opposite to the college in which the *pueri* or *portionistæ* had resided since c 1515, when they were moved into the college. It also appears as the appellation of the *portionistæ* in English letters of this period in the Records. But these casual occurrences show only that it was then a long-established name. As to its origin nothing is known; it has been variously conjectured to be a corruption of *portionista*, or a re-coining of '*post-magister* or '*post-scholar*, in allusion to the Master or Fellows, perhaps standing behind their chairs at dinner, etc. But *post-scholastes* does not occur in the college registers, and the occurrence of *post-magister* is doubtful.

Sense 1 is the original; the plant to which it is applied was to Gerarde, in 1597, 'the common Potatoes'; the plant in sense 2, on account of its general likeness to the other as producing esculent tubers, he called from its alleged source 'Virginia Potatoes', and (in his Catalogue of 1599) 'Bastard Potatoes'; but when this cause to be an important object of cultivation as a food plant, it became 'the potato' par excellence; the exotic plant and tuber originally so named being distinguished by some adjunct. In 17th c. instances of the word it is often difficult or impossible to determine which plant is meant.

1. A plant, *Batatas edulis*, N. O. *Convolvulaceæ*, having tuberous roots, for which it is cultivated for food in most tropical and subtropical regions of the world; = BATATA. Its native region is unknown, but it appears to have been seen by the Spaniards first in the West Indies *c* 1500. Now distinguished as *Sweet* or *Spanish potato* (see § 2).

2. The plant *Solanum tuberosum*, a native of the Pacific slopes of South America, introduced into Europe late in the 16th century, and now widely cultivated for its farinaceous tubers: see b.

Described in 1553, under the name *papas*, in the *Cronica de Peru* of Pedro Cieza, cap. vi, + 2. Introduced into Spain, it is said, from Quito, soon after 1560, and thence, c 1585, into Italy: in 1587 grown at Mons in Hainault, whence in 1588 the tubers were obtained and grown by the botanist Clusius, Keeper of the Botanical Garden at Montpellier (1); described by him as *Papas Peruanum*. Soon grown in other botanic gardens, as at Bologna in 1590. The plant may have been brought independently to England, where Gerarde had it growing in 1596; but he was in error in his statement that it obtained it from Virginia (whence the erroneous name *Virginian Potatoes*, long kept up by English writers); for the plant is not a native of Virginia, and was not cultivated there in 1585 (1). In 1589 the introduction into England was attributed to Sir Walter Raleigh (after his return from Virginia (where he never was); but no contemporary statement crediting Raleigh's name with the potato has been found. See Brushfield *Neighbours* 11 in *Trans. Devonsh. Assoc.* 1898, XXX, 156–191; R. Dayden Jackson in *Gardeners' Chron.* 1901, XXVIII. 161, 176.

Potato-ring. A recent fanciful appellation for Irish dish-rings of the 18th c., now collected as objects of *virtu*.

The dish-ring was a loop of silver, often elaborately chased, or adorned with pierced and repoussé work, used as a stand for a circular bowl or the like; in use c 1750–1800. The appellation 'potato-ring' is due to the supposition, unfounded notion that the loop was used to keep together a heap of potatoes in the middle of the dinner-table.

1893 *Times* 9 June 10/4 A number of old Irish potato-rings were placed with cups-pieces—40 per cent. 1908 *Manch. Mag. Dec.* 10 Two candles, in early Hanoverian candle-sticks, lit up the celebrated potato-ring in the centre of the table.

4. Gram. That expresses potentiality or possibility: *potential mood*, a name sometimes given to the subjunctive mood, when used to express possibility; the subjunctive mood used potentially.

In French Grammar, sometimes applied to the Conditional (*Littré*, *s. v.* verbe, 22, 1).

1529 Lyndsay *Pr. Papingo* 60 Sum Modus...is weary quhyle he hath vi, the Indicatyve, Imperatyve, optative or potencial, the subjunctive, the conditionall, and the infinityve. 1600 Percivall *Fox, Fueris* (1616) 30 Now know you the Potential Mood? It denoteth an ability, will, or duty in us any thing. 1709 J. Mason *Lex. Poeticus*, I. *Potential Mood in Grammar*, is the same in Latin with the *Subjunctive*; but differs in this, That it hath always implied in it, either *Posseem, Velim*, or *Debeo*; as *Regnet Deus*, that is, *Regnare possit*, a Man may ask. 1864 L. Murray *Engl. Grammar*, 3rd. ed. I. vi. 119 That the Potential Mood should be separated from the subjunctive, is evident, from the brevity and confusion which are produced by their being blended together, and from the distinct nature of the two moods; the former of which may be expressed without any condition, supposition, etc. 1897 G. Perkins *Syntax Greek*, 211, The tenses, especially the future, either alone or in connection with one or more particles, in many cases express a potential, subjunctive, or hypothetical sense. 1906 Nesbit *Eng. Gramm.* 206, 90 To these should (Infinitive, Indicative, Imperative, Subjunctive) many grammarians add the Potential Mood, meaning by that mood certain combinations of the so-called auxiliary verbs *may, might, can, could, must*, with the adverbial mood. This is objectionable.

b. With humorous play on sense 2.

1880 T. Jordan *Leaders' Glory* 3 [Followed by] all Lord Mayors in the Potential Mood. 1893 Pall Mall Budget 22 Apr. 8/2 By those who govern in the mood potential.

5. *Physics.* **a.** *Potential function*: a mathematical function or quantity by the differentiation of which the force at any point in space arising from any system of bodies, etc. can be expressed. In the case in which the system consists of separate masses, electrical charges, etc., this quantity is equal to the sum of these, each divided by its distance from the point.

Introduced in 1828, by G. Green, with special reference to electricity. Now usually called simply *potential*: see B. 5.

1828 G. Green *Appl. Math. Anal. to Electr. & Magn.* in *Math. Papers* (1871) 9 Nearly all the attractive and repulsive forces...in nature are such, that if we consider any material point *p*, the effect, in a given direction, of all the forces acting upon that point, arising from any system of bodies it may be considered, will be expressed by a partial differential of a certain function of the co-ordinates which serve to define the point's position in space. The consideration of this function is of great importance in many inquiries...We shall often have occasion to speak of this function, and will therefore, for shortness, call it the potential function arising from the system *S*. 1880 Maxwell *Theory Electricity*, 139 The function φ is called the potential function of the circuit, and the curves obtained by varying the constant in the equation φ = C are called curves of equal potential.

b. *Potential energy*: energy existing in a positional form, not as motion: see Energy 6.

Introduced by Rankine in 1853, *potential* being opposed to *actual*, as in sense 2; Thomson and Tait substituted *kinetic* for *actual*, making *potential energy* the opposite of *kinetic energy*. The Latin expression *vis potentialis* has been used by the late Bernoullis and Euler (1736).

1732 Euler *Methodus inveniendi Lineas curvas*, etc. 247 Quaestiones eam vis centripetum...Daniel Bernoulli sibi indicavit in universum vim, quae in binis elasticis locorum viris, non quidem formata, quam vim *potentialem* appellat, comparari possit.

1853 W. Rankine *Transform. Energy in Ind. Papers* (1881) 203 By the occurrence of such changes, actual energy disappears, and is replaced by Potential or Latent Energy; which is measured by the product of a change of state into the resistance against which that change is made. (The vis viva of matter in motion, thermometric heat, radiant heat, light, chemical action, and electric currents, are forms

of actual energy; amongst those of *potential* energy are those of the mechanical powers of gravitation, elasticity, chemical affinity, statical electricity, and magnetism. 1868 Graham *Addr. Chem.* 31 We may thus render muscular force latent in a stretched bowstring, raised cannon-ball, or other instrument, for any length of time. This latent force is generally spoken of as potential energy, while the active force manifests at any moment by the flying arrow or falling ball constitutes its actual or dynamic energy. 1868 Thomson & Tait *Elem. Dynamics* 74 The *potential energy* of a conservative system, in the configuration which is best as any instant, is the amount of work that its constituent parts are supplied by...the weight of a clock..., by gunpowder, the chemical affinities of whose constituents are called into play by a spark. 1881 Maxwell *Electr. & Magn.* ed. 2) I. 16 To determine the value of the potential energy when the nugget is placed in the field of force expressed by this potential.

B. *sb.* † **1.** A potential agent, a thing that gives power. *Obs. rare.*

1656 Blount *Glossogr.*, *Potentials*, things apt to breed or give power, strength or ability.

2. That which is possible, opposed to what is actual; a possibility.

1879 Cleasby *Icel. Dict.* I. xli. 241 The *potential* verbs in *-ian*, even as the actual verbs in *-ast*. 1883 Stevenson *Life Nature* (ed. 6) I. 624 With this belief our highest thoughts of the potential for humanity are connected. 1887 E. M. Rossiter *Rev. Crit. Method* 30 The faculty...exists to hold to reach to highest *potential*, or the aim of literature, in the case of personal gift cultivated by a literary life.

3. *Gram.* Short for *Potential mood*: see A. 3 a.

4. *Physics.* Short for *potential function*: see A. 3 c. Hence, the amount of energy or quantity of work denoted by this, considered as a quality or condition of the matter, electricity, etc., in question. See quots.

1868 G. Green *On Appar. Mech. Attr.* etc. in *Math. Papers* (1871) 32 This equation is remarkable on account of its simplicity and singularity, seeing that it gives the value of the potential for *any point P*, whilst the surface, when *V* its value at the surface itself, is known, together with the [*f*. The potential at any point in the neighbourhood of or within a charged body is the quantity of work that would be required to bring a unit of positive electricity from an infinite distance to that point if the given distribution of electricity remained undisturbed. 1881 R. H. Thurston *Elem. Mech.* (1891) 277 Instead of the word tension, used with reference to the work that can be effected by a charge when equally insulated, or electro-motive force, the word *potential* is now used. 1883 Tarbotton & Tait *Nat. Philos.* (1883) II. 29 § 483 This function (the potential) was introduced by Laplace, but the name was first given to it by Green, who may almost be said to have to that created the theory, as we now have it. *Ibid.* § 485 The *Potential* or any point, due to any attracting or repelling body, or distribution of matter, is the mutual potential energy between it and a unit of matter placed at that point. 1891 Preece & Sivewright *Telegraphy* 3 Potential implies that function of electricity which corresponds to motion from one pole to another. And the difference of potential, which determines the amount of this motion, is called electromotive force. 1879 G. Forbes *Sp. Telephone* 37 The difference...of magnetic potential existing between the diaphragm and the core is increased. 1880 Maxwell *Electr. & Magn.* I. 76 Potential. In electrical science, has the same relation to Electricity that pressure, in Hydrostatics, has to Heat, or that temperature, in Thermodynamics, has to Heat. 1881 Joseph *Electr.* 32 The effect of contact is producing or maintaining difference of potentials. 1892 *Pall Mall G.* 2 Feb. 6/1 (H. Tesla's demonstrations) Current of these extremely high potentials appear to be absolutely without effect upon the human organism. 1902 *Encycl. Potwaller (pɒ·twɔ·lə(r)). [f. Pot *sb.*¹ + waller, agent-n. from Wall v., Obs. swallow to boil.]

Sh. = *Pot-boiler*, the boiler of a pot: the term applied in some English boroughs, before the Reform Act of 1832, to a man qualified for a parliamentary vote as a householder (i. e. tenant of a house or distinct part of one) as distinguished from one who was merely a member or inmate of a householder's family; the test of which was his having a separate fire-place, on which his own pot was boiled or food cooked for himself and his family.

According to 18th c. statements, the test was at times altered by persons not householders, who in anticipation of an election and of receiving money for their vote, boiled a pot in the presence of witnesses on an improvised fireplace in the open air within the borough, and thus passed as potwallers.

Pound (pound), *sb.*[1] Forms: 1–4 (*Sc.* and *n. dial.* -ȝ) pund, (4–5 *n. dial.* punde); 3– pound, (4–6 pounde, pownd; pond(e). [OE. *pund* (pl. *pund*) :—WGer. stem **funde*- pound (weight), = Oshn., OFris., ON., Goth. *pund* (MLG. *punt*, LG. *pund*, MDu. *pont*, Du. *pond*), OHG. *phunt* (MHG. *pfunt*, G. *pfund*), a very early adopted word, n. L. *pondo* indecl. a pound (weight), orig. instr. abl. of **pondus*, -*us* = *pondus*, -*eris* weight, in use short for *libra pondo* a pound by weight, a pound weight.]

I. 1. A measure of weight derived from the ancient Roman *libra* (= 327.25 grams), but very variously modified in the course of ages in different countries, and so used for different classes of things: in the British Empire now fixed for use in trade by a Parliamentary standard. Denoted by *lb.* (L. *libra*).

Formerly used without change in the pl., a usage still sometimes retained after a numeral, esp. *dial.* and *colloq.*, also in comb. as *a five pound note*, *a twenty pound shot*.

This genus contained originally 12 ounces, corresponding more or less to that of Troy weight, 5,760 grains = 373.25 grams. This is still used by goldsmiths and jewellers in stating the weights of gold, silver, and precious stones; but as early as the thirteenth or fourteenth century a pound of eighteen ounces was in use for more bulky commodities. This was made a standard for

general purposes of trade by Edward III, and known as *the pound de poit, de peis*, i. e. of *quarrandise* of weight, now called Avoirdupois, q.v. This pound of 16 ounces, containing 7000 grains = 453·6 grams, has been since that the only legal pound for buying or selling any commodity in Great Britain. In Ireland there the general weight is nearly here 12 to 17 ounces, according to the commodity, pounds of different weight being often used in the same place for different articles, as bread, butter, cheese, meat, malt, hay, wool, etc. See a list in *Old Country and Farming Words* (E. D. S.) 254-5. The Scotch pound of 16 ounces of Troy or Dutch Weight, consisted of 7056·3456 grains: the Troy pound kept at Edinburgh = 5760 to guineas. *Pound* is also used to translate foreign names of weights, of supposed weights or representatives of L. *libra*. Drugs vary greatly: in Italy between 300 and 350 grams, in Spain and Portugal, the Netherlands, and some German states between 450 and 484 grams, in other German states, Denmark, etc. between 467 and 500 grams. But the standard German *pfund* is never 500 grams, but a half a kilogram.

Pound, v.[3] [f. Pound *sb.*[3] 2.]

† **1.** *trans.* To weigh. *Obs. rare*[—0].

1570 Levins *Manip. vocab.* To Pound, *ponderare*.

2. *Cooking.* To beat the weight of coins (or of the blanks to be minted) by weighing the number of these which ought to make a pound weight (or a certain number of pounds), and ascertaining how much they vary from the standard.

From the earliest times, in the Indentures under which the Master of the Royal Mint produced coins for the King, a limit was assigned within which the weight was to be maintained; and as it was impossible to make every coin of the exact weight, it was customary, before 1870, to test the number of grains variation permissible in each pound weight, taken at random from the mass of coins, this variation being termed "remedy for the Master". Thus, for gold coins, in which 22 troy pounds of standard gold were 934l sovereigns, the Indentures of 1717 allowed a margin of "twelve grains to the pound weight and no more". By the Coinage Act of 1870, the "remedy" was fixed on the pieces, as 3 grains on each sovereign, each of which is now separately tested by an automatic weighing apparatus of great delicacy.

1850 *Gent. Mag.* II. 1. 7 Standing in coining. 1877 *Lect. R. Royal Mint.* The process how to fix so nice a weight, but for particular purposes) we still constantly resort to pounding in the Mint, and always in the case of bronze coins.

1597 *Lett. to Minister &c. Cumberl.* The weight of salt contained in one gallon of brine...is usually about 2 lb. 10 oz.; if it is so little as 2 lb. 8 oz., the brine is not worth working. The poundage is measured by a graduated hollow glass instrument, similar to that used in ascertaining the specific gravity of a fluid. The gallon is not the imperial, but the old wine gallon. The standard poundage in these mines then is 2 lb. to the imperial gallon. The word is in constant use at the Cheshire and Staffordshire Salt Works, but is never used at Droitwich.

But the spelling *pore* is found in some 15th c. writings, and *poor* (*poerh*, *n. pōr*) in Palsgrave and Shaks. The late 18th and 19th c. (*pōə*), given by Nares 1784, disapproved by Walker (1791–), approved by Webster 1828, Smart 1836, is not easy to account for. It could hardly be derived from (*pōəɹ*); it may be a dialectal survival of the 15th c. *poor*, though connecting evidence is wanting; it may also be 19th c. *poor* (=*pōr*), altered as in *flour*, *sour*, and vulgar *more*, *pore*, *chore*, *pore*, for *more*, *poor*, *sure*, *poor*.)

(*Note.* It has been suggested that ME. *pour-out* was an irregular representative of F. *pourer* :—L. *putare* to purify (with religious rites). F. *pourer*, now 'to wash', had in Of. the sense 'to purify, clarify, cleanse, clear'; also in Norman 'to drip'. Earlier senses (and mostly, as it occurs in Rouen texts, *c* 1180 in Godef.), as still in Cotgrave (*Je Tripes que pore dans l'orge*, 'I bear the cider dripping or pouring into the trough' Marri, and in mod. Norman and other dialects 'to drip, drop, ooze, or flow out'; in Burgundy, etc., 'to grow, swing, or squeeze [as] a water out of anything (*Godef.*)'. English shows no trace of an original sense 'purify'; not even of 'pour or squeeze out', and the intransitive sense 6, which comes near that of 'drip or flow out', is not of early appearance; so that the historical connexion of senses is not evident. The etymology also presents difficulty; it is doubtful whether Eng. has any certain instance of an Of. word as it was from Fr. *u* : L. *ŭ*.)

The same reduction of the first syllable is seen in the Sc. form *purtith*, FOURTEEN, from OF. *pourtēt*.

Here, as in the early forms of POOR, the ambiguity of *u* or *v* before the 17th c. makes the pronunciation of many early forms uncertain. Some mod. F. dialects have *pouvreté, pauvreté* and the original *v* was prob. vocalized or suppressed in some forms of OF., as the γ forms and the double PROVINCE show that it was from the 14th c. in some MSS. (Suchier).]
